Mr. Jeff Lu, Ms. Lauren Stroud
Lumos Labs
19th, 140 New Montgomery Street
94105 San Francisco, CA

Dear Mr Lu, Ms Stroud,

I am writing this letter to show my keen interest in Lumos Labs. I will be quitting my current devops position at Alpaca.ai in less than 2 months, and after playing on Lumosity for near to 2 months, I've come to really appreciate this application and wish to become part of the team and improve it. Along with my Master's Degree in Computer Science from SUPINFO and 8 years' experience in the field of IT, particularly in Development Operations, I am confident in my ability to become an essential member of Lumos Labs.

From my experience in startups such as Aquasys and Alpaca.ai, one of my main responsibilities were to build, maintain and improve their infrastructure, mostly hosted on AWS. As an example, we've recently released Labell.io, deep learning labelling and model training platform, and I successfully built a scalable system, which could stay up-running despite a high load spike at launch. Several bugs could be quickly identified and hotfixed without disturbing the operations.

It would be a great pleasure to meet with you in an interview to discuss my qualifications and experience in detail. Although I'm living in Osaka and do not plan to relocate before a couple years, I would be perfectly operational working remotely with a few trips every year to San Francisco (one of the cities I enjoyed most living in) to get some quality time with the team.

Thank you for your time and consideration, I look forward to speaking with you further.

Sincerely yours,

Adrien Lemaire
