Online version

CTO and full-stack engineer with 16 years of experience, 9 of them leading engineering, taking products from idea to production. Co-founded Made In Tracker and built MD Atlas, a medical-device regulatory search engine with **110,000+ users** across 170 countries.

"A top-level CTO [...] he knows how to turn an idea into a concrete solution."
— Sylvie Ravasio, investor in Made In Tracker

Experience

2023/03 – present
Toulouse, France
(remote)

Co-Founder & CTO — Made In Tracker

B2B SaaS for traceability and EU MDR regulatory data in the medical-device industry, GDPR-compliant. Labelled deeptech startup; 1 patent.

- Built MD Atlas (md-atlas.com), a regulatory intelligence search engine for medical devices: **5.2M records** (companies, devices, certificates, people, documents) kept fresh by crawlers of public databases, with conformity alerts and feed monitoring.
- Launched EasyUDI, a B2B SaaS for UDI/EUDAMED compliance (GS1 DataMatrix labels, XML validation, audit trail, RAG chatbot): **14 customers**, €40k revenue, go-live in as little as 3 days.
- Shipped MD Atlas in **2 months** instead of 2 years for 6 developers, through agentic development on a typed, tested stack (TypeScript, Supabase, Vercel, Nix); MCP server in the official MCP Registry; about €300 a month of infrastructure.
- Took R&D to paid pilots with Anopa (**€25k** revenue) and SobraBTP (product passports, secure QR codes); won the Axone contest.
- Co-raised **€180k** (9 angel investors and public funding) and reported to investors monthly; co-managed a budget of up to €112k a year, stretched with cloud credits negotiated through incubation programs; valued at €1.7M by an independent expert after a review of code and data ownership proofs.
- Built and led a team of **up to 8** (about 20 people since 2023), hired through a CTF challenge, interviews and a live coding test, and coached 12+ developers; owned architecture, code review and infrastructure.

Stack: TypeScript, React, Flutter, Python, PostgreSQL/Supabase, GCP, Vercel, Nix, LLM/RAG, MCP

2017/05 – 2023/02
Osaka, Japan / remote

CTO — YAOYA Inc.

- Rewrote Reach@, the content service, from PHP/jQuery to Django/Wagtail and Kubernetes: 2,000+ articles a month, **¥100M+** yearly revenue.
- Led product engineering through three iterations of GOunite (internship marketplace, online school, metaverse) on React, GraphQL, Neo4j and Pixi.js.
- Led a department of 4 developers and 25 interns.

2016/02 – 2016/12
Osaka, Japan

Senior Full-stack Developer — ShareWis Inc.

- Led the ShareWis ACT MOOC marketplace (Ruby on Rails, payments, i18n) and its React Native apps; automated delivery on AWS and GitHub.

2015/09 – 2016/02
Osaka, Japan

Software Engineer — Rakuten

- Kicked off the large-scale PHP/Symfony migration of O-net, Japan's largest marriage agency (43,500+ members), and ran a security audit.

2014/06 – 2015/09
Kobe, Japan

Engineer — Alpaca.ai

- Designed the core of AlpacaDB, released as Labellio, a deep-learning image labelling service (Kubernetes, Django, Caffe), and delivered computer-vision R&D for major Japanese gaming and search companies.

2011/04 – 2014/08
Okinawa, Japan

Director of Technology, Software Engineer — Aquasys

Director of Technology (2012/11 – 2014/08), Software Engineer (2011/04 – 2012/11)

- Supervised all technical operations; hired, trained and managed freelancers; built a Django marketplace framework and administered Odoo.

2010/07 – 2011/03
London, UK

Django Developer — Fry-IT

- Built a Django e-portfolio for London hospitals (PostgreSQL, Celery) using TDD.

Skills

Leadership	engineering management, technical strategy and roadmap, hiring and coaching, budget, fundraising, investor relations
Stack	TypeScript, JavaScript, Python, Dart; React, Node.js, Flutter, Django
Data & AI	PostgreSQL, Supabase, Neo4j, LLM/RAG, MCP, AI agents, computer vision
Infrastructure	GCP, Firebase, Vercel, AWS, Docker, Kubernetes, Nix, CI/CD
Practices	TDD, DDD, Lean Startup, code review, agentic coding (Claude Code)

Recommendations

"Adrien is what I would call an 'enabler'. [...] He thinks that a small team of extremely good developers produce a better output than a large team of average developers, and his behavior demonstrates that."

— Jimmy Crequer, direct report at YAOYA & contractor at Made In Tracker

"[...] his constant learning and strong architectural perspective. [...] he demonstrated that he is a resilient leader. [...] I'd definitely recommend him for a leadership position."

— Marcel Akiyama, Product Designer, at Alpaca and Made In Tracker

Languages

French (native) · English (bilingual) · Japanese (professional)

2006 – 2011

Education

SUPINFO International University — International Master of Science in Computer Science (studied in France, Canada, the UK and the USA)

Certifications

Wharton Entrepreneurship (2016)

Interests

Triathlon, ultra-marathon, child education, dog training, chess
