Trilingual CTO and full-stack engineer with 16 years of experience, 9 of them as head of engineering and 11 in Japan. Co-founded the MedTech SaaS Made In Tracker after 6 years as CTO of YAOYA.

"A top-level CTO [...] he knows how to turn an idea into a concrete solution."
— Sylvie Ravasio, investor in Made In Tracker

Co-Founder & CTO — Made In Tracker

B2B SaaS for traceability and EU MDR regulatory data in the medical-device industry, GDPR-compliant. Labelled deeptech startup; 1 patent.

- Built MD Atlas (md-atlas.com) in **2 months** with agentic development: a regulatory search engine of **5.2M records** crawled from public databases, used by **110,000+ users** across 170 countries; 576,000 lines of TypeScript, 2,365 test files; MCP server in the official Registry; €300 a month to run.
- Secured its 40 GB multi-tenant database deny-by-default: row-level security on all 101 public tables, zero errors on the Supabase security linter.
- Launched EasyUDI, a B2B SaaS for UDI/EUDAMED compliance (GS1 DataMatrix labels, XML validation, audit trail, RAG chatbot): **14 customers**, €40k revenue, go-live in 3 days. Took R&D to paid pilots with Anopa (**€25k**) and SobraBTP (Prolog/SPARQL traceability engine); won the Axone blockchain contest.
- Co-raised **€180k** (9 angel investors and public funding) and reported to investors monthly; co-managed a budget of up to €112k a year; valued at **€1.7M** by an independent expert after a review of code and data ownership proofs.
- Built and led a team of **up to 8** at a time (20 people since 2023, interns to contractors), hired through a CTF challenge, and coached 12+ developers; owned architecture and code review.

Stack: TypeScript, React, Flutter, Python, PostgreSQL/Supabase, GCP, Vercel, Nix, LLM/RAG, MCP

2017/05 – 2023/02
Osaka, Japan / remote
30 staff

CTO — YAOYA Inc.

- Rewrote Reach@, the content service, from PHP/jQuery to Django/Wagtail: 2,000+ articles a month, **¥100M+** yearly revenue.
- Led product engineering through three iterations of GOunite to **2,500+ users**; its 8-day SME internship programme became the top revenue line.
- Built its 2.5D metaverse web game (GRANDstack, Pixi.js): WebSocket servers autoscaled on Kubernetes held **60 fps** under load, with zero downtime.
- Led a department of 4 developers and 25 interns; 4 interns moved on to developer jobs, 1 hired in-house.

Stack: Django, Wagtail, Kubernetes, React, GraphQL, Neo4j, Pixi.js, WebSocket

2016/02 – 2016/12
Osaka, Japan
8 staff · 5 devs

Senior Full-stack Developer — ShareWis Inc.

Led the ShareWis ACT MOOC marketplace (Ruby on Rails, payments, i18n) and its React Native apps; automated delivery on AWS and GitHub.

2015/09 – 2016/02
Osaka, Japan
40 devs · team of 3

Software Engineer — Rakuten

Showed that migrating O-net's 40-year-old code (Japan's top marriage agency, 43,500+ members) needed 3 years, not 6–12 months; pitched a Symfony rewrite.

2014/06 – 2015/09
Kobe, Japan
5 staff · 4 devs

Engineer — Alpaca.ai

Designed the core of Labellio, a deep-learning image labelling service sold to Kyocera for $300k, and computer-vision R&D for gaming and search leaders.

2011/04 – 2014/08
Okinawa, Japan
4 staff

Director of Technology, Software Engineer — Aquasys

Supervised all technical operations; hired, trained and managed about 10 freelancers; built a Django marketplace framework and administered Odoo.

2010/07 – 2011/03
London, UK
12 staff · 2 devs

Django Developer — Fry-IT

Built a Django e-portfolio for London hospitals using TDD (PostgreSQL, Celery); praised by Peter Bengtsson (later Mozilla, GitHub).

2006 – 2011

Education

SUPINFO International University — International Master of Science in Computer Science (studied in France, Canada, the UK and the USA)

Dominican University of California — IT Management and Marketing Certificate

Skills

Leadership	engineering management, roadmap, hiring and coaching, budget, fundraising
Domain	EU MDR, UDI/EUDAMED, GS1, GDPR, traceability, row-level security
Stack	TypeScript, JavaScript, Python, Dart; React, Node.js, Flutter, Django, Tailwind
Data & AI	PostgreSQL, Supabase, Neo4j, LLM/RAG, MCP, AI agents, computer vision
Infrastructure	GCP (Vertex AI), Firebase, Vercel, AWS, Docker, Kubernetes, Nix, CI/CD
Practices	TDD, DDD, Lean Startup, code review, agentic coding (Claude Code)

Recommendations

Jimmy Crequer
Direct report at YAOYA, contractor at Made In Tracker

"Adrien is what I would call an 'enabler'. During the time I worked under him, he helped me to become better on areas I was already good at, and also gave me opportunities to grow my skillset on new topics."

Kevin Mandrick, PhD
Co-founder & CEO of Made In Tracker

"[...] an exceptional resilient leader as a CTO who perfectly bridges the gap between vision and lightning-fast execution. [...] knows how to stretch a startup budget."
